DANISH-FRENCH CYBER SECURITY ROUNDTABLE

INVITATION

OCTOBER 9TH 2019, 10.30-15.00

Ministry of Economy and Finance (Bercy)

On the occasion of the visit of Their Royal Highnesses the Crown Prince Couple of Denmark to France, we are pleased to send you this invitation.

HOW DO WE SECURE TRUST IN RELATIONSHIPS BETWEEN ORGANISATIONS, CITIZENS, COMPANIES AND OTHER PARTNERS IN AN EVER EVOLVING DIGITAL THREAT LANDSCAPE? JOIN OUR ROUNDTABLE WITH LEADING FRENCH AND DANISH EXPERTS IN CYBER SECURITY TO DISCUSS THIS QUESTION AND CURRENT STATE-OF-THE-ART SOLUTIONS.

Digitization is an efficiency and growth engine. However, it increases dependency on digital solutions, with an associated vulnerability to incidents that lead to ICT system breakdowns and other cyber threats (data integrity…).

Denmark, as a highly digitized and one of the most innovative countries in Europe, is well positioned to benefit from this growth but is also exposed to cyber threats.

France is experiencing a strong growth in this sector and is home to two of the world's leading digital companies, namely, Atos and Thales/Gemalto with activities in Cybersecurity, Fintech, AI and Transport.

At this roundtable you can meet up with the French and Danish tech community and learn about the opportunities in both countries!
